

Versapower[®]-Xtreme[™]

Radyne Induction Power Supplies

RADYNE

An Inductotherm Group Company

Versapower® -Xtreme™

Offering never before seen flexibility via on-unit or remote controls, optional right or left coil mounting positions, advanced safety features, and more, the Versapower®-Xtreme™ is in a class of its own.

Overview

The VersaPower®-Xtreme™ is a highly versatile tabletop induction power supply suitable for a wide range of metal heating applications including hardening, tempering, annealing, post and pre heating, brazing, wire processing and more.

Excelling in highly repetitive processes, the VersaPower®-Xtreme™ is able to accelerate processing speeds by precisely and consistently focusing heat on parts to deliver an exact internal thermal profile.

Equipped with Radyne's intuitive Digital-iQ™ technology, the unit is able to ramp from 0-100% of rated power in as low as 50 milliseconds to deliver maximum accuracy. Regardless of the process, precision controls provide the ability to achieve uniform metallurgical quality, while instant operation without heat up time allows for an adaptable system that keeps up with varying production speeds and changes.

Features

The Versapower®-Xtreme™ offers added flexibility with its lightweight design, optional right or left coil mounting positions, and variety of standardized models suitable for precisely matching the desired induction heating application.

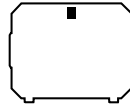

Dual Output

Left or right coil mounting positions allows for optimal unit placement within the production line.

Operating System

An integrated Quality Assurance System (QAS) offers real-time processing against limits and fault/trip on process step to help deliver higher quality parts and enhanced repeatability. Embedded Digital-iQ™ software powers real-time monitoring, remote control, and diagnostics.

Safety

The Versapower®-Xtreme™ system is equipped with a safety detection technology able to automatically disengage the unit in case of hardware failure or hazardous conditions. The emergency stop button and electric breaker are placed in an easily reachable position for secure operation.

Digital iQ™ Real-time Monitoring

The Versapower®-Xtreme™ is equipped with the intuitive, high speed Digital iQ™ control platform. Specific to Radyne equipment and built for quick and simple usability, Digital iQ™ provides advanced communication, control, and programming features to achieve unbeatable accuracy.

100% digital, Digital iQ™ systematically monitors multiple electrical characteristics and allows the user to set and adjust power limits on demand and by stored recipe- both able to ramp from 0-100% of rated power in as low as 50 milliseconds.

The companion Digital iQ™ for desktop allows operators to remotely connect, control, and monitor a VersaPower®-Xtreme™ unit. Data is printable in strip charts or tabulated data and exportable as excel workbooks for further flexibility and adaptability within any production ecosystem.

Embedded Digital iQ

Digital iQ Desktop

System Requirements	Embedded in VersaPower®-Xtreme™ and TFD models	OS: Windows 7 Processor: 1 GHz Intel Memory: 256 MB RAM Hard Drive: 20 GB HD space
Control	Integrated actuator, buttons, encoder, 3.25" screen Remote control via PLC	Keyboard and mouse Remote control via Ethernet
Remote	Control single, embedded system only	Unlimited remote control

Committed to your success

We believe in building strong relationships.

Founded in 1946, Radyne has developed unequalled skill and facilities in the field of Induction Heating.

Our products and processes offer a winning combination of innovative technology and custom automation. We employ years of experience to deliver the exacting results you demand, and stand behind all of our high-quality equipment with outstanding customer service and support.

As a proud member of the Inductotherm Group of 40 companies located worldwide, Radyne has established a strong global network of manufacturing and service facilities, along with access to a full range of engineering, installation and repair services that are always available wherever your business is located.

Leading manufacturers of melting, thermal processing and production systems for the metals and materials industry worldwide.
